Coulomb's Law constant K / kg & Sec (M.K.S.) measure units
 of Giovanni Giorgi, = 8.841941×10^{-9} farad/meter

This exact value of Coulomb's constant, k_e , comes from three of the fundamental, invariant quantities that define free space in the SI system: the speed of light c_0 , magnetic permeability μ_0 , and electric permittivity ϵ_0 , related by Maxwell - wiki

Matrix9! Avogadro Constant 6.0221354166666

The Faraday constant is the amount of electric charge carried by one mole, or Avogadro's number, of electrons.

the precision of the Avogadro constant is the uncertainty in the value of the Planck Constant, as all the other constants that contribute to the calculation are known more precisely. - wiki

The Great Pyramid of Giza Scaling Law
Fractal Harmonic Cartographic Generalization Data

Cartographic generalization, or map generalization, is a method for deriving a smaller-scale map from a larger scale map or map data. Whether done manually by a cartographer or by a computer or set of algorithms, generalization seeks to abstract spatial information at a high level of detail to information that can be rendered on a map at a lower level of detail. - wiki
